Frame: rugged heavy-duty frame constructed of one-piece formed channel steel offering light-weight strength. Reinforced gussets and bulkheads.

Forks: reinforced for added strength with tapered ends for easy pallet entry.

Paint: the ELP55 boasts a quality powder coat finish.

Hydraulic pump: quality pump design complete with a special lowering valve allowing controlled rate of descent, and an overload by-pass valve.

Pump stroke: features a full 90 degree top to bottom stroke – requires 10 strokes to raise the forks to maximum lift.

Handle: features a bolt-on, ergonomically designed spring-a-matic handle that returns to the upright position automatically.

Control valve: the control handle has three positions (raise/neutral/lower) fingertip control.

Steering: featuring 180 degree pivot action for greater maneuverability with 7" polyurethane wheels, sealed bearings and "ball-thrust" steering. Articulated axle allows for level transport of loads on uneven floors.

Load rollers: features 2.9" polyurethane rollers with sealed bearings.

Push rods: adjustable push rods allow for individual adjustment capability of either fork height.

Hangers: one-piece hangers are constructed of cast iron for greater strength and longevity.

Helper rollers: features entry and exit ramp for easy handling of pallets.

Pivot points: the ELP55 features grease fittings and bushings at all pivot points for easy maintenance.

Options: tandem wheels, automotive brake attachment.
